TECHNICAL ASSESSMENTS

Data delivered with confidence

No two facilities are the same when it comes to reducing their energy consumption. To ensure the optimum performance of every facility, our experts provide technical in-person facility assessments to analyze your opportunities and needs. We'll deliver a comprehensive, site-specific solution to save you energy and money while lowering carbon emissions as a whole.

We identify your energy needs.

No matter the scale or complexity of your commercial facility's energy systems, our Design Build team is here to help. We offer personalized in-depth assessments that fit around your schedule, complete with comprehensive analytics and reporting to ensure you reach and exceed your goals.

① In-person facility assessments

Our energy engineers will analyze your energy use, evaluate the performance and remaining useful life of your equipment and systems, consider the constructability of alternative solutions, then help you establish clear project goals so you can upgrade with confidence.

② Analytics and reporting

Each of our energy assessments benefit from the experience of our world-class engineers and project developers who leverage sophisticated data analysis and industry best practices. We integrate site and utility data to develop custom recommendations that optimize your energy use for efficiency, savings and performance.

Proven pay backs that protect our planet

68+ projects
up and running

\$50M+
in total project value

175+ MWh
saved annually

\$11M+
in annual energy savings

\$8M+
in total incentives processed

2-5 year pay backs
for most investments

Getting the job done, step by step

Assessments

Analyzing commercial energy systems to find new ways to improve efficiency.

Design

Providing custom-tailored designs for critical systems that save energy and money long-term.

Build

Getting to work on your energy-saving improvements with a vendor of your choice.

Management

Maintaining and improving your systems for commissioning and even more savings.

We change the way people use energy, *for businesses.*
