Carbon Consulting

REDUCE

Energy and emissions reduction starts here.

When you're ready to put your carbon reduction plan into action, our teams are fully equipped to begin the work and take implementation off your hands. By connecting your plan to the people who can get the job done, you can actively track your project's progress and deliver impactful results to your stakeholders.

Let's create meaningful change.

Unified with a strategic plan and common purpose, the real work behind reducing your carbon footprint can truly begin. Whether it is a one-time significant overhaul or moderate changes made over time, we'll work together to lower your carbon output year after year.

1 Implement

Each emission reduction project is unique. Our in-house teams of Design Build engineers and Strategic Energy Management specialists can handle your complex carbon challenges and develop custom plans to address them head-on. From equipment installation to carbon-reducing behavioral changes, we're here to make your large improvements seamless and simple.

2 Connect

For anything we can't take on in-house, we'll bring in our broad and diverse network of skilled partners to fill any additional reduction gaps, including on-site generation and offset purchases, to complete your plan on time and on budget.

3 Manage

Once you've started your emissions reduction initiatives, our team will manage the full project and report progress to all key stakeholders through CLEAResult ATLAS™ Carbon's real-time reduction dashboard.

Key areas of focus

Behavior

Saving energy often starts with simple behavioral changes to use less each day.

Equipment

Upgrading outdated equipment to certified, energy-efficient models ensures your savings last.

On-site generation

Producing on-site renewable energy is likely easier and more affordable than you think.

Offsets

Purchasing carbon offsets for any remaining energy usage lets you reach your goals with ease.

CLEAResult ATLAS™ | Carbon

Our all-in-one carbon consulting solution.

- ✓ Customer-centric UI
- ✓ Customer service and support
- ✓ Project management and reporting
- ✓ Secure data storage
- ✓ CUSUM or regression modeling
- ✓ ESG reporting standards

We change the way people use energy, *for businesses.*
