

# Strategic Energy Management

IMPROVE

Keep your momentum going.

There are even more opportunities for positive progress now that your energy-saving projects are underway. Continue to capture progress and momentum in your energy management program by working with our team of experts to ensure systems are maintained and optimized while routinely evaluating and adjusting your sustainability goals.

## Let's keep your energy goals on track.

With energy management projects up and running, you have a unique opportunity to continue refining and advancing your energy savings initiatives. Working with our team, you'll have a side-by-side partner to help continuously facilitate your program while also keeping an eye on your energy reduction targets.

### 1 Track

As new systems and processes are implemented, we'll work with you to routinely follow up and inspect the work that was done as well as report any savings earned and additional areas of maintenance that may be required.

### 2 Advise

When projects reach their target goal, our teams will regroup to recommend where to focus your time and energy next. We specialize in advising on new equipment, scaling energy-saving solutions as your business grows and other custom initiatives that maximize your efficiency efforts.

### 3 Innovate

Complex energy challenges require creative solutions. Together with your organization, we can create new ideas and initiatives to ensure your approach to energy use is always current, and most importantly, successful.

## Key areas of focus

### Behavior

Saving energy often starts with simple behavioral changes to use less each day.

### Equipment

Upgrading outdated equipment to certified, energy-efficient models ensures your savings last.

## CLEARResult ATLAS™

Our all-in-one SEM solution
